

JUDY BENDIT^{RDH} BS

AT THE HEART OF DENTAL EDUCATION

If experience is the best teacher, then Judy Bendit is among the very best when it comes to the field of dental education. With more than 35 years of hands-on experience in a clinical environment, Judy was literally born and raised in a dental office. Judy's programs involve "hands-on" activities with "over-the-shoulder" observations and assessment. Judy believes that the best way to learn is through doing, which is why she has crafted her educational sessions to operate on a personal level and to be completely interactive.

WORKSHOPS AND LECTURES

 HALF DAY

SMARTEN UP AND SHARPEN UP!

This informal and interactive workshop highlights some of the latest and greatest guides, aids, and automated sharpeners that can help one achieve sharp cutting edges on scalers and curettes. Participants will receive a sense of confidence, a new perspective and attitude toward sharpening, and the skills to accomplish the task quickly and easily.

 HALF DAY

THE HEART AND SOUL OF ULTRASONICS*

This workshop provides the opportunity for each participant to analyze and utilize a variety of ultrasonic inserts on typodonts and truly get to the "Heart" of Ultrasonic scaling. In this workshop, we will focus on equipment, specific inserts, as well as technique.

 HALF DAY

POSITIONING FOR LIFE: ERGONOMIC ADVANCEMENTS IN DENTISTRY*

This course is designed for the dentist and dental hygienist to help the clinician become comfortable with recent advancements in instrument designs and practical techniques to reduce occupational injury. We will discuss appropriate chair-side products, their design and usage, and how these can reduce the risk of occupational injury.

 HALF DAY

JAZZ UP YOUR CLINICAL ROUTINE*

In this course, participants will experience a true "hands-on" approach to instrument design evaluation. Each participant gets the unique opportunity to examine the newest instruments designed specifically for the contemporary practitioner. This will provide the confidence, knowledge, and experience to aid them when deciding if they have "what it takes" to provide the best care for their patients.

 LECTURE

SOMETHING TO CHEW ON - THE AFFECTS OF AGING ON ORAL HEALTH*

Just like all of us, our patients are advancing in age and are facing some complicated age-related consequences. Food impactions, expanding restorations, temperature sensitivity, xerostomia, grinding, and erosion are just a few of the many issues they will face as they grow older. This course looks at the contributing factors that will be affecting our aging patients and provides an opportunity to discuss their personal, and our professional dilemmas. We will chew on the facts and spit out potential solutions that will help us all age tastefully.

 LECTURE

THE 4 C'S IN SOLVING THE CARIES PUZZLE*

This program introduces a suggested “caries risk assessment” survey to identify individual patient risk level for dental caries. Mapping a treatment plan is only successful when the dental team understands all factors that influence the caries pattern and prevalence based on medical history, lifestyle changes, behaviors and disease factors.

The program will preview several case studies that begin with CAMBRA and design a mapping to incorporate appropriate therapies and patient-applied practices to reverse early carious patterns. In the final segment of this seminar, the participants will all be encouraged to share their successes with all the latest remineralization products and how they plan to improve their day-to-day practice using evidence-based science. This half day program is totally sponsored by Premier.

 LECTURE

THE MYTHS, LEGENDS AND REALITIES OF OTC PRODUCTS*

Remember when the dental care aisle in your local pharmacy was actually just a small section of an aisle and only contained a handful of toothbrushes, toothpastes, and maybe some mouthwash? Clearly, times have changed. Now, the dental care is truly an entire aisle (or two) and is filled with a variety of products including toothbrushes, toothpastes, mouthwashes and rinses, and so much more. It's overwhelming for any dental professional...let alone your patients. Let's look at the historical progression of many of these products along with many of the DIY modalities to figure out what is best for our individual patients needs.

 LECTURE

PAVING THE WAY TO TOMORROW*

How technology is changing delivery of care for Caries patients

Throughout history, mankind has constantly been in search of a better way. A better way to travel. A better way to communicate. A better way to educate. Finding a better way requires a plan that involves mapping out ones destination, setting a course, carving out a path, and ultimately paving the way. This program focuses on the innovations and advancements in remineralization products and technologies that will influence and change the delivery of care we provide to our patients tomorrow.
